But *transcendental* is a wider term than *intuitive*, including all within the limits of thought that is not derived from experience, as the ideas of space and time. "*Transcendent* he [Kant] employed to denote what is wholly beyond experience, being neither given as an a posteriori nor a priori element of cognition—what therefore transcends every category of thought." KRAUTH-FLEMING *Vocab. Philos.* p. 531. *Transcendental* has been applied in the language of the Emersonian school to the soul's supposed *intuitive* knowledge of things divine and human, so far as they are capable of being known to man. *Transcendent, transcendental,* and *intuitive* are opposed to *empirical* or, according to the philosophy of Kant, *transcendent* is opposed to *immanent,* and *transcendental* to *empirical.* See MYSTERIOUS.

SYN.: (adj.) brief, ephemeral, evanescent, fleeting, flitting, flying, fugitive, momentary, passing, short, temporary, transitory. A thing is *transient* which in fact is not lasting; a thing is *transitory* which by its very nature must soon pass away; a thing is *temporary* which is intended to last or be made use of but a little while; as, a *transient* joy; this *transitory* life; a *temporary* chairman. *Ephemeral*, literally lasting but for a day, often marks more strongly than *transient* exceeding brevity of duration: it agrees with *transitory* in denoting that its object is destined to pass away, but is stronger, as denoting not only its certain but its speedy extinction; thus that which is *ephemeral* is looked upon as at once slight and perishable, and the word carries often a suggestion of contempt; man's life is *transitory*, a butterfly's existence is *ephemeral*; with no solid qualities or worthy achievements a pretender may sometimes gain an *ephemeral* popularity. That which is *fleeting* is viewed as in the act of passing swiftly by, and that which is *fugitive* as eluding attempts to detain it; that which is *evanescent* is in the act of vanishing even while we gaze, as the hues of the sunset.—ANT.: abiding, enduring, eternal, everlasting, immortal, imperishable, lasting, permanent, perpetual, persistent, undying, unfading.

Trapezium.

Euclid defined a *trapezium* as any quadrilateral except a square, an oblong, a rhombus, and a rhomboid. Later Greek geometers seem to have used the word in the more restricted sense of a quadrilateral with one pair of parallel sides; and the word trapezoid was introduced to describe a quadrilateral which had no two sides parallel. (*Chambers Encyc.* vol. x, p. 278.)

The *trapezium* is a quadrilateral with two parallel sides. The most important form of *trapezium* is that in which one of the two remaining sides of the figure is at right angles to the two parallel sides. The *trapezium* is then a right *trapezium*. (*Encyc. Brit.* 11th ed., vol. xviii, p. 137.)

Roman.	Black Letter.	Script.	Revised Scientific.

U, u, 1 yū; 2 yu, *n.* [UES, U's, or *Us*, 1 yūz; 2 yus, *pl.*] **1.** A letter: the twenty-first in the English alphabet. It was originally the sign of the vowel heard short in *pull*, long in *pool*. In this book the sounds of this letter are indicated by the following symbols: (1) 1 u; 2 u, as in *full, pulpit*, etc. It is used also (*a*) to indicate the sound of *u* in the syllable *-ful*, as, cup*ful*, etc., (*b*) after *s* = sh, as in *censure* (1 sen'shur, 2 çĕn'shur), *sugar* (1 shug'er; 2 shu'gar); (*c*) before *sh*, as in *bush, push, cushion;* (*d*) to indicate the sound of *o* as in *woman, wolf*, and of *oul* as in *could* (1 kud; 2 cud); (*e*) to indicate the sound of *oo* as in *book, good, stood;* (*f*) to indicate syllables that are short in quantity in the Roman pronunciation of Latin, and in other foreign languages.

(2) 1 ū; 2 u, as in *rude, rule, true*, etc. It is used (*a*) chiefly after *r, l*, or *j*, as in *crude, fluid, jubilee, judicial;* (*b*) to indicate the sound of *eu*, as in *brew, crew, Jew, lewd, rheum*, etc.; (*c*) to indicate the sound of *ui*, as in *bruise, cruise, fruit, juice*, etc.; (*d*) to indicate the sound of *ou*, as in *group, through, you, youth*, also heard in words derived from the French as *croup, soup*, etc., *rouge, route*, etc., *bouquet, routine*, etc.; (*e*) to indicate the sound of *oo*, as in *droop, food, mood, rood, woo*, etc.; (*f*) to indicate syllables that are long in the Roman pronunciation of Latin or of scientific terms and in other foreign languages.

(3) 1 u; 2 ŭ, as in *but, dun, hunger*, etc., is popularly called **short u,** and is a "low mixed" vowel. It is used (*a*) chiefly in monosyllabic words or in accented syllables which end in a consonant, as *bust, crust, Prussia*, etc., *unto, supper*, etc.; (*b*) in unaccented syllables, as *circus, succeed;* (*c*) to indicate the sound of *o* before *m, me, n, ne, ng, th*, and *z*, as in *among, comfort, come, son, done, tongue, nothing, brother, dozen*, etc.; (*d*) to indicate sound of *oo*, as in *blood, flood*, etc.; (*e*) to indicate the sound of *oe*, as in *does;* (*f*) to indicate the sound of *ou*, as in *double, pious*.

(4) 1 ū; 2 ŭ, as in *burn*. This symbol is used only before *r* generally followed by a consonant, as in *curl, furnace, hurst, nurse, purse*. It is used to indicate the sounds of (*a*) *o* in *work*, (*b*) *oe* in *Goethe*, (*c*) the Fr. *eu* in *douceur* (1 dū"sūr'; 2 dų"sūr').

(5) 1 iu; 2 ŭ, as in *duration, futility*. **Long u** is the name by which this diphthong is popularly known: it is given also to the *u* in *tube* (see next) which may or may not be diphthongal.

(6) 1 iū; 2 ŭ, as in *avenue, constitution, pupil, tube, beauty*.

In some other words the *u* when unstressed is obscured and this is indicated by **the "obscure" vowel ə.** This is vocal resonance reduced to its lowest terms and produced with the least possible interference with the speech-current on its outward passage. It is the sound to which all the low vowels, to some extent also *e* and *i*, tend when not fortified by the accent. It is technically a "mid-mixed" vowel, closely akin to ʊ, but differing from it by its weaker resonance; (cp. the second vowel, of *humdrum* with that of *tantrum*, which is virtually identical with that of *monarch, ever, fagot, martyr*).

Capital U is from Roman through Greek, differentiated by the Greeks from the signs for consonant *u* = *v*, and originally from Phenician waw or vau, from which F also is derived. (See F.) F, U, V, W, Y are all from Phenician *vau*. Latin V U were graphic variations merely, and *v u* continued to be so to the 16th century. In the 9th century runic w came into use in Anglo-Saxon. For explanation of the symbols noted above, and for those of Key 2, see Introduction.

un-[1], *prefix.* Not: used [to express negation, incompleteness, or opposition. [< AS. *un-,* = L. *in-,* = Gr. *an-, a-,* not.]

un-[2], *prefix.* Back: used to express the reversal of the action of the verb. It is also prefixed to nouns to make a verb denoting deprivation of the state or quality expressed by the noun; as, to *unhorse.* In some cases, *un-,* when prefixed to a verb, simply intensifies the negative idea of the verb; as, to *unloose.* [< AS. *un-, on-, ond-, an-, anu-,* back.]

The following list contains some of the more noticeable of the many self-explaining words beginning with *un-* (either *un-*[1] or *un-*[2]). (1) In the verbs in the list *un-* gives the sense of reversal (see UN-[2] above); as, *unchain,* "to loose the chains of." (2) In the nouns and the adjectives (including participles in *-ing* and *-ed*) it has simple negative force, except in such of the words in *-ed* and *-ing* as may be regarded as participles of a corresponding verbal form in UN-[2]. Thus, *unburdened* may be regarded as an adjective (UN-[1] + BURDENED), meaning "not burdened," or as a participle of the verb *unburden,* meaning "relieved of a burden." *In-* as a prefix to adjectives expresses in usage more of negation, *un-* more of mere lack or privation; as, a child's *unartistic* speech, a writer's *inartistic* diction. In general, *in-* is more confined to words of Latin origin. Many of the adjective forms have derivative adverbs in *-ly,* and nouns in *-ness* and *-ity,* whose meanings are evident; in case of doubt, consult the primitive and suffix. Pronunciations, definitions, etymologies, etc., may be found by referring to the primitive word. Definitions are given in vocabulary place where required, as, for example, *unconscionable,* of which the primitive form is no longer in use; *unbrief,* which has a strongly positive, and not merely negative meaning; also, when the word has a specific meaning, or is of special importance, or is abnormal in any respect.

Syn.: coalition, combination, conjunction, junction, juncture, oneness, unification, unity. *Unity* is *oneness,* the state of existing as essentially one, especially of that which never has been divided or of that which can not be conceived of as resolved into parts; as, the *unity* of God or the *unity* of the human soul. *Union* is a bringing together of things that have been distinct, so that they combine or coalesce to form a new whole, or the state or condition of things thus brought together; in a *union* the separate individuality of the things united is never lost sight of; we speak of the *union* of the parts of a fractured bone or of the *union* of hearts in marriage. But *union* can be said of that which is manifestly or even conspicuously made up of parts, when a single purpose or ideal is so subserved by all that their possible separateness is lost sight of; as, we speak of the *unity* of the human body, or of the *unity* of the church. See ALLIANCE; ASSOCIATION; ATTACHMENT; HARMONY; MARRIAGE.—Ant.: analysis, contrariety, decomposition, disconnection, disjunction, dissociation, disunion, division, divorce, separation, severance.—**the Union.** **1.** The United States regarded as a national unit. After the union these were blended by blazoning the cross of St. George on the Scottish flag. In 1801 the cross of St. Patrick, a red saltire on a white ground, was combined with the others. This union now fills the canton in the red, the white, and the blue ensigns.—**u'nion-ist,** *n.* An advocate of union: (1) A member of a trade-union. (2) [U-] *U. S. Syn.: advantage, advantageousness, avail, benefit, expediency, profit, service, serviceableness, use, usefulness. *Utility* is somewhat more abstract and philosophical than *usefulness* or *use,* and is often employed to denote adaptation to produce a valuable result, while *usefulness* denotes the actual production of such result. We contrast beauty and *utility.* We say of an invention its *utility* is questionable, or, on the other hand, its *usefulness* has been proved by ample trial, or, I have found it of *use;* still, *utility* and *usefulness* are frequently interchanged. *Expediency* (literally, the getting the foot out) refers primarily to escape from or avoidance of some difficulty or trouble: either *expediency* or *utility* may be used to signify *profit* or *advantage* considered apart from right as the ground of moral obligation, or of actions that have a moral character, *expediency* denoting immediate *advantage* on a contracted view, and especially with reference to avoiding danger, difficulty, or loss, while *utility* may be so broadened as to cover all existence through all time, as in the utilitarian theory of morals. *Policy* is often used in a kindred sense, more positive than *expediency,* but narrower than *utility,* as in the proverb "Honesty is the best *policy.*" See PROFIT; SERVICE.—Ant.: disadvantage, folly, futility, impolicy, inadequacy, inexpediency, inutility, unprofitableness, uselessness, worthlessness.—**utility man.** **1.** Same as UTILITY, 4 (1). **2.** *Baseball.* A member of a team who acts as a substitute.—**u-til"i-ta'ri-an.** **I.** *a.* **1.** Relating to utility; especially, placing utility above beauty or the amenities of life. **2.** Pertaining to or advocating utilitarianism. **II.** *n.* One devoted to mere material utility; an advocate of utilitarianism.—**u-til"i-ta'ri-an-ism,** *n.* **1.** *Philos.* A system that holds utility of some kind to be the end and criterion of action. Specif.: (1) The ethical doctrine that actions derive their moral quality from their usefulness as means to some end, usually as means productive of happiness or unhappiness. V[1]**, v,** 1 vī; 2 vē, *n.* [VEES, V's, or *Vs,* 1 vīz; 2 vēs, *pl.*] **1.** A letter: the twenty-second in the English alphabet. This letter is used in this book to indicate its own sound, as in *vat, have.* The name *ve, vee,* French *ve,* is a modern formation in analogy with the Latin names of *b, c, d, g, p, t. V* was commonly called "single *u,*" as *w* was "double *u,*" so late as 1617. Most English *v's,* especially initial, are in words from the French or Latin. *V* never stands final. Nearly all the *v's* in modern English in words from Anglo-Saxon are from *f's* made sonant by coming between two sonants, as in *leaf, leaves; half, halves. V* is technically a "labiodental voiced spirant" or "fricative." The corresponding voiceless spirant is *f.* In Anglo-Saxon there was no letter *v,* its sound being denoted by *f,* rarely by *u.* In Middle English *u* came into common use for the voiced *f,* and this *u* was finally differentiated into *v.* The great mass of initial *v's,* and some that are not initial, come ultimately from L. *v,* which was at first bilabial, but became labiodental in the 2d century A. D. and remained so in the derived languages. A few represent L. *b* or even *p;* cf. *govern, river,* ultimately from L. *gubernare, ripa.* Capital V is a Latin letter, a graphic variation of U. **2.** A symbol noting in the Roman notation, five; with a line above it (V̄), 5,000.

(2) Abandoned; having neither claimant nor heir, as an estate. [F., < L. *vacan(t-)s,* ppr. of *race,* be empty.]

Syn.: blank, empty, unemployed, unfilled, unoccupied, vacuous, void, waste. That is *empty* which contains nothing; that is *vacant* which is without that which has filled or might be expected to fill it; *vacant* has extensive reference to rights or possibilities of occupancy. A *vacant* room may not be *empty,* and an *empty* house may not be *vacant. Vacant,* as derived from the Latin, is applied to things of some dignity; *empty,* from the Saxon, is preferred in speaking of slight, common, or homely matters, but it may be applied with special force to the highest; we speak of *empty* space, a *vacant* lot, an *empty* dish, an *empty* sleeve, a *vacant* mind, an *empty* heart, an *empty* boast, a *vacant* office, a *vacant* hour. *Void* and *devoid* are rarely used in the literal sense, but for the most part confined to abstract relations, *devoid* being followed by *of,* and having with that addition the effect of a prepositional phrase; as, the article is *devoid of* sense; the contract is *void* for want of consideration. Vacuous, in this connection, applies to that which is made so by devastation or ruin, or gives an impression of desolation, especially as combined with vastness, probably from association of the words *waste* and vast: *waste* is applied also to uncultivated or unproductive land, if of considerable extent; we speak of a *waste* tract or region, but not of a *waste* city lot. *Vacuous* refers to the condition of being *empty* or *vacant,* regarded as continuous or characteristic. Vase, with Principles of Design.

Proportions for a vase may be obtained thus: Draw a circle on the diameter of the proposed vase, and a larger but concentric circle through the base. If the greater circle is divided by radii into 16 equal parts, and lines be dropped vertically from the intersection of these radii with the smaller circle, the points of intersection of these verticals with the corresponding chords of the larger circle will give guiding-points for the proper outline. Syn.: hireling, mercenary, purchasable, salable. *Mercenary* has especial application to character or disposition; as, a *mercenary* spirit; *mercenary* motives—that is, a spirit or motives to which money is the chief consideration or the moving principle. Thus, etymologically, the *mercenary* can be hired, while the *venal* are openly or actually for sale; *hireling* (AS. *hyrling*, from *hyr*) signifies serving for hire or pay, or having the spirit or character of one who works or of that which is done directly for hire or pay. The *hireling*, the *mercenary*, and the *venal* are alike in making principle, conscience, and honor of less account than gold or sordid considerations; but the *mercenary* and *venal* may be simply open to the bargain and sale which the *hireling* has already consummated: a clergyman may be *mercenary* in making place and pay of undue importance while not *venal* enough to forsake his own communion for another for any reward that could be offered him. The *mercenary* may retain much show of independence; *hireling* service sacrifices self-respect as well as principle; a public officer who makes his office tributary to private speculation in which he is interested is *mercenary;* if he receives a stipulated recompense for administering his office at the behest of some leader, faction, corporation, or the like, he is both *hireling* and *venal;* if he gives essential advantages for pay, without subjecting himself to any direct domination, his course is *venal*, but not *hireling.*—Ant.: disinterested, honest, honorable, incorruptible, patriotic, unpurchasable.—**ve·nal'i·ty,** *n.* The state or character of being basely or improperly influenced by sordid considerations; prostitution, as of talents, office, etc., for gain or reward.—**ve'nal·ly,** *adv.*

[OF., < L. *venerabilis*, < *veneror*, revere.] Syn.: see ANCIENT.—**ven'er·a·bl**(e-ness‡, *n.* **ven"er·a·bil'i·ty**†.—**ven'er·a·bly,** *adv.*—**ven'er·ate,** *vt.* [-AT"ED; -AT"ING.] To look upon or regard with honor and deference; revere.

Syn.: adore, honor, respect, revere, reverence. In the highest sense, to *revere* or *reverence* is to hold in mingled love and honor with something of sacred fear, as for that which while lovely is sublimely exalted and brings upon us by contrast a sense of our unworthiness or inferiority; to *revere* is a wholly spiritual act; to *reverence* is often, but not necessarily, to give outward expression to the reverential feeling; we *revere* or *reverence* the divine majesty. *Révere* is a stronger word than *reverence* or *venerate.* To *venerate* is to hold in exalted honor without fear, and is applied to objects less removed from ourselves than those we *revere*, being said especially of aged persons, of places or objects having sacred associations, and of abstractions; we *venerate* an aged pastor, the dust of heroes or martyrs, lofty virtue or self-sacrifice, or some great cause, as that of civil or religious liberty; we do not *venerate* God, but *revere* or *reverence* him. We *adore* with a humble yet free outflowing of soul. See ADMIRE; DEIFY.—Ant.: contemn, despise, disdain, dishonor, disregard, scoff at, scorn, slight, spurn.—**ven"er·a'tion,** *n.* **1.** The act of venerating; reverence. **2**‡. The act of worshiping; worship.

Syn.: adoration, awe, dread, reverence. *Awe* is inspired by that in which there is sublimity or majesty so overwhelming as to awaken a feeling akin to fear; in *awe*, considered by itself, there is no element of esteem or affection, but the sense of vastness, power, or grandeur in the object is always present. *Dread* is a shrinking apprehension or expectation of possible harm awakened by any one of many objects or causes, from that which is overwhelmingly vast and mighty to that which is productive of momentary physical pain; in its higher uses *dread* approaches the meaning of *awe*, but with more of chilliness and cowering, and without that subjection of soul to the grandeur and worthiness of the object that is involved in *awe*. *Awe* is preoccupied with the object that inspires it; *dread* with apprehension of personal consequences. *Reverence* and *veneration* are less overwhelming than *awe* or *dread* and suggest something of esteem, affection, and personal nearness. We may feel *awe* of that which we can not reverence, as a grandly terrible ocean storm; *awe* of the divine presence is more distant and less trustful than *reverence. Veneration* is commonly applied to things which are not subjects of *awe. Adoration*, in its full sense, is loftier than *veneration*, less restrained and awed than *reverence*, and with more of the spirit of direct, active, and joyful worship. See REVERENCE. Compare VENERATE.—Ant.: contempt, disdain, dishonor, disregard, scorn.—**ven'er·a"tor,** *n.*

ve'ni·al, 1 vī'nɪ-əl; 2 vē'ni-al, *a.* That may be pardoned or overlooked; excusable. [OF., < L.[LL] *venia*, pardon.]

Syn.: excusable, pardonable, slight, trivial. Aside from its technical ecclesiastical use, *venial* is always understood as marking some fault comparatively *slight* or *trivial.* A *venial* offense is one readily overlooked; a *pardonable* offense requires more serious consideration, but on deliberation is found to be susceptible of pardon. *Excusable* is scarcely applied to offenses, but to matters open to doubt or criticism rather than direct censure;

so used, it often falls little short of justifiable; as, I think, under those circumstances, his action was *excusable*.—Ant.: inexcusable, mortal, unpardonable.—**venial sin** (*R. C. Ch.*), a fault inconsistent with perfect righteousness, but which, owing to a want of deliberation or to the minuteness of the matter, does not take away sanctifying grace.—**ve″ni-al′i-ty**, *n.* **ve′ni-al-ness‡**.—**ve′ni-al-ly**, *adv.*

[F., < LL. *verbalis,* < L. *verbum,* word.]

Syn.: literal, oral, vocal. These words, whose etymology would make them similar in meaning, are differentiated in usage by their applications. *Oral* (L. *os,* the mouth) signifies uttered through the mouth or (in common phrase) by word of mouth; *vocal* (L. *voz,* the voice) signifies of or pertaining to the voice, uttered or modulated by the voice, and especially uttered with or sounding with full, resonant voice; *literal* (L. *littera,* a letter) signifies consisting of or expressed by letters, or according to the letter in the broader sense of the exact meaning or requirement of the words used; what is called "the letter of the law" is its *literal* meaning without going behind what is expressed by the letters on the page. Thus *oral* applies to that which is given by spoken words in distinction from that which is written or printed; as, *oral* tradition; an *oral* examination. By this rule we should in strictness speak of an *oral* contract or an *oral* message, but *verbal* contract and *verbal* message, as indicating that which is by spoken rather than by written word, have become so fixed in the language that they can probably never be changed; this usage is also in line with other idioms of the language; as, "I give you my *word*"; "a true man's *word* is as good as his bond"; "by *word* of mouth," etc. A *verbal* translation may be *oral* or written, so that it is word for word; a *literal* translation follows the construction and idiom of the original as well as the words; thus a *literal* translation is more than one that is merely *verbal;* both *verbal* and *literal* are opposed to *free*. In the same sense, of attending to words only, we speak of *verbal* criticism, a *verbal* change. *Vocal* has primary reference to the human voice; as, *vocal* sounds, *vocal* music; *vocal* may be applied within certain limits to inarticulate sounds given forth by other animals than man; as, the woods were *vocal* with the songs of birds; *oral* is never so applied.—**verbal noun,** a noun directly derived from a verb, in English often having the form of the present participle. —**ver'bal-ly,** *adv.*

Principle of the Vernier.

The vernier, *ab*, which corresponds in length to 9 divisions of the fixed scale, AB, is divided into 10 equal parts. When the ends coincide, as in the first figure, the 10th or end line of the vernier is just opposite a line on the fixed scale. If the vernier be pushed toward the right, so that the first marks on the two scales are opposite, it will have been moved just one-tenth of a scale-division, for this is the difference between the two scales; if the second lines are opposite, it will have been moved two-tenths, and so on. Hence the exact position of the end may be known by observing which lines are opposite each other. In the second figure, the rod *mn* evidently measures 4 divisions and a fraction, and since the eighth line on the vernier is opposite a line on the fixed scale, that fraction is just eight-tenths.

Syn.: chastity, duty, excellence, faithfulness, goodness, honesty, honor, integrity, justice, morality, probity, purity, rectitude, righteousness, rightness, truth, uprightness, virtuousness, worth, worthiness. *Virtue* is *goodness* that is victorious through trial, perhaps through temptation and conflict. *Goodness*, the being morally good, may be much less than *virtue*, as lacking the strength that comes from trial and conflict, or it may be very much more than *virtue*, as rising sublimely above the possibility of temptation and conflict—the infantile as contrasted with the divine *goodness*. *Virtue* is distinctively human; we do not predicate it of God. *Morality* is conformity to the moral law in action, whether in matters concerning ourselves or others, whether with or without right principle. *Honesty* and *probity* are used especially of one's relations to his fellow men, *probity* being to *honesty* much what *virtue* is to *goodness*; *probity* is *honesty* tried and proved, especially in those things that are beyond the reach of legal requirement; above the commercial sense, *honesty* may be applied to the highest truthfulness of the soul to and with itself and its Maker. *Integrity*, in the full sense, is moral wholeness without a flaw; when used, as it often is, of contracts and deal-

ings, it has reference to inherent character and principle, and denotes much more than superficial or conventional *honesty*. *Honor* is a lofty *honesty* that scorns fraud or wrong as base and unworthy of itself. *Purity* is freedom from all admixture, especially of that which debases; it is *chastity* both of heart and of life, but of the life because from the heart. *Duty*, the rendering of what is due to any person or in any relation, is, in this connection, the fulfilment of moral obligation. *Rectitude* and *righteousness* denote conformity to the standard of right, whether in heart or act; *righteousness* is used especially in the religious sense. *Uprightness* refers especially to conduct. *Virtuousness* is a quality of the soul or of action; in the latter sense it is the essence of virtuous action. SYN.: attainment, depth, discernment, discretion, enlightenment, erudition, foresight, information, insight, judgment, judiciousness, knowledge, learning, lore, prescience, profundity, prudence, reason, reasonableness, sagacity, sense, skill, understanding. *Enlightenment, erudition, information, knowledge, learning,* and *skill* are acquired, as by study or practise. *Insight, judgment, profundity* or *depth, reason, sagacity, sense,* and *understanding* are native qualities of mind, but capable of increase by cultivation. The other qualities are on the border-line. *Wisdom* is mental power acting upon the materials that fullest *knowledge* gives in the most effective way. There may be what is termed "practical *wisdom*" that looks only to material results; but in its full sense *wisdom* implies the highest and noblest exercise of all the faculties of the moral nature as well as of the intellect. *Prudence* is a lower and more negative form of the same virtue, respecting outward and practical matters, and largely with a view of avoiding loss and injury. *Judgment,* the power of forming decisions, especially correct decisions, is broader and more positive than *prudence,* leading one to do, as readily as to refrain from doing; but *judgment* is more limited in range and less exalted in character than *wisdom. Skill* is far inferior to *wisdom,* consisting largely in the practical application of acquired *knowledge,* power, and habitual processes, or in the ingenious contrivance that makes such application possible. In the making of something perfectly useless there may be great *skill,* but no *wisdom.* Compare ACUMEN; ASTUTE; KNOWLEDGE; PRUDENCE; SAGACIOUS.—Ant.: absurdity, error, fatuity, folly, foolishness, idiocy, imbecility, imprudence, indiscretion, miscalculation, misjudgment, nonsense, senselessness, shallowness, silliness, stupidity. X[1], x, 1 eks; 2 ĕks, *n.* [EXES, X's, or Xs, 1 eks'ez; 2 ĕks'ĕz, *pl.*] **1.** A letter: the twenty-fourth in the English alphabet. It is a sign for the combination *ks*, as in *extra*, or *gz*, as in *exact*. When initial, as in *Xanthous*, it is pronounced like *z*. The name *ex* is Latin.

In the Latin alphabet *x* was redundant, as it is now in our own. In modern English the *x* of unstressed *ex-* preceding a vowel usually becomes *gz*; cp. *exact, exhaust*. Before unaccented *t*, as in *anxious, noxious* and before *u*, as in *flexure*, x is pronounced as *kṣh*. When final it is sometimes heard as in *box*, and sometimes silent, as in *billet-doux*. In Spanish and Spanish-American proper names *x* is pronounced as *h*.

The character X is, through Latin, from an Early Western Greek, an addition of the Greeks to the Phenician alphabet.

Y y Roman. **𝔜 𝔶** Black Letter. ***Yy*** Script.

Y¹, y, 1 waı; 2 wȳ, *n.* [WYES, Y's, or *Ys*, 1 waız; 2 wȳs, *pl.*] **1.** A letter: the twenty-fifth in the English alphabet. It is a sign of the palatal semivowel, heard in *yet*, and is also used, interchangeably with *i*, for the diphthong ɑı, as in *type*, for ī, as in *physic*, and for the final element of a diphthong, as in *boy*. In the respellings in Key 1 in this dictionary it is used only for the sound heard in *yet*. Diphthongal *y*, as in *type*, and its corresponding short, as in *typical*, are now simply orthographic variants of *i*. They derive from Greek upsilon, *υ*, which was at first u, then ū. In the second century A. D. the Romans took over the letter in the form *y*, with the sound ū, and in time passed it on to Anglo-Saxon and the Romance languages. In Middle English ū was unrounded to simple ī; and as the letter was a favorite with the penmen on account of its final flourish, they fell into the habit of substituting it for final *i*; hence, to-day, *city, carry*, but *cities, carries*. *Y* for *at* or *ī* is now useless in English spelling, but was used frequently in Old English.

The occasional use of *y* for *th* in print affecting "quaintness," as *ye* for *the*, is due to a confusion of the letter *y* with the Anglo-Saxon character *thorn*. See THORN, *n.*, 4; YE. *The* was never pronounced *ye*.

Z

Z z Roman. Black Letter. Script.

Z[1], **z**, 1 zī *or* (*Eng.*) zed; 2 zē *or* (*Eng.*) zĕd, *n.* [ZEES, Z's, or Zs, 1 zīz; 2 zēs, *pl.*] **1.** A letter: the twenty-sixth and last in the English alphabet. It has two sounds: that of a voiced s, as in *zest, buzz,* and that of a voiced sh, as in *azure.* The former, the 'voiced supradental spirant,' is denoted in Key 1 by z; the latter, the 'voiced palatal spirant,' by ʒ. For their phonetic character and relationships see under S.

In the Latin alphabet *z* was used to transcribe the Greek ζ, which had the sound of *dz.* The Anglo-Saxons made but little use of *z;* when, therefore, in the Middle English period, the need of a separate letter for the voiced *s* began to be felt, *z* was available and came into extensive use, but the substitution was never carried out thoroughly; *s* continued to be written in inflectional endings and in most (not all) words of Latin origin. Hence, today, *goes* (not *goez*), *man's, foxes, rose, fuse, desire,* etc. The *z* sound is written *s* far more often than it is written *z.*

The voiced palatal spirant ʒ results phonetically in numerous words from *z*+*y;* cf. *azure* (*azyur*), *closure, division, fusion.* In a few French words it is written *ge: garage, prestige.* The letter is silent in *rendezvous.*

Z was the seventh letter in Phenician, Greek, and Latin, but dropped from Latin in the 3d century B. C., and when it was restored to write Greek words in the 1st century B. C. it took its place at the end of the alphabet.
